
Derrell A Manceaux, P.E.
Senior Structural Engineer
Federal Highway Administration

Mr. Manceaux is currently a licensed Professional Engineer in Colorado and a senior bridge engineer in Denver, Colorado. He has been with the Federal Highway Administration for 22 years and spent 19 years in actual bridge design as a designer and Team Leader with the FHWA, Federal Lands Highway Division. He has designed numerous structures types over most of the United States and has a special interest in designing structures in high seismic areas. He joined the FHWA Resource Center in 2004 and has been providing seismic workshops throughout the country.

In addition, Mr. Manceaux is working with the AASHTO T3 committee in reviewing the seismic specifications currently being developed. He has assisted several agencies in seismic related work and provided assistance to design and analysis concerns.

Mr. Manceaux graduated from the University of Tennessee in 1983 with a Bachelor of Science Degree. He then graduated from the University of Tennessee with a Master of Engineering Degree. After working several years, he returned to the University of California at Berkeley, California to graduate with a Master of Science Degree specializing in seismic design and analysis.
