Contents

Progress and Accomplishments of the Center Approach in Earthquake Engineering Research 1
George C. Lee

Analysis and Simulation of Earthquake Strong Ground Motion for Earthquake Engineering Applications 7
Apostolos Papageorgiou

Advanced Web-based GIS Management Technology 27
Arthur J. Lembo, Amanda Bonneau and Thomas D. O’Rourke

Defining and Measuring Economic Resilience to Earthquakes 41
Adam Rose

Restoration Modeling of Lifeline Systems 55
Rachel A. Davidson and Zebra Çagnan

Resilience of Integrated Power and Water Systems 65
Masanobu Shinozuka, Stéphanie E. Chang, Tsen-Chung Cheng, Maria Feng, Thomas D. O’Rourke, M. Ala Saadeghvaziri, Xuejiang Dong, Xianhe Jin, Yu Wang and Peixin Shi

Assessing the Role of Lifeline Systems in Community Disaster Resilience 87
Stéphanie E. Chang and Christopher Chamberlin

Seismic Response Modification of Structural and Nonstructural Systems and Components in Acute Care Facilities 95
Amjad Aref, Michel Bruneau, Michael Constantinou, Andre Filatrault (Coordinating Author), George C. Lee, Andrei Reinhorn, and Andrew Whittaker

Organizational Decision Making with Respect to Extreme Events: Healthcare Organizations Respond to California’s SB 1953 121
William J. Petak and Daniel J. Alesch

Evolutionary Methodologies for Decision Support 141
Gary Dargush, Mark Green, Yunli Wang and Yufeng Hu

Networks and Resilience in the World Trade Center Disaster 157
Kathleen Tierney and Joseph Trainor
Application of High-Resolution Optical Satellite Imagery for Post-Earthquake Damage Assessment: The 2003 Boumerdes (Algeria) and Bam (Iran) Earthquakes
Beverley J. Adams, Charles K. Huyck, Babak Mansouri, Ronald T. Eguchi and Masanobu Shinozuka

Java-Powered Virtual Laboratories for Earthquake Engineering Education
Yong Gao, Guangqiang Yang, Billie F. Spencer, Jr. and George C. Lee

Liquefaction Mitigation in Silty Soils Using Composite Stone Columns and Dynamic Compaction
Thevachandran Shenthan, Rafeek G. Nasbed, Sabanayagam Thevanayagam and Geoffrey R. Martin

New Developments in Seismic Risk Analysis of Highway Systems
Stuart D. Werner, Craig E. Taylor, Sungbin Cho, Jean-Paul Lavoie, Charles K. Huyck, Chip Eitzel, Ronald T. Eguchi and James E. Moore II
