## Preface

*George C. Lee, Mai Tong and W. Phillip Yen* ..... v

## 1 Multiple Hazard Research Efforts With the AASHTO Code Development Activities

*Harry A. Capers, Jr.* ..... 1

## 2 Hazard-Resistant Design from Code to Practice: The Viewpoint of a Bridge Designer

*Thomas P. Murphy* ..... 13

## 3 Normal Function vs. Hazard Resilience in Bridge Design—View of a Stakeholder

*George A. Christian* ..... 19

## 4 A Probability-based Methodology for Comparison of Extreme Hazard Loadings for Bridge Design

*Mai Tong and George C. Lee* ..... 25

## 5 The Bridge Owner’s Dilemma with Less Common Events

*Susan E. Hida* ..... 37

## 6 Extreme Hazard Quantifications from Hindsight to Forecast

*John M. Kulicki* ..... 49

## 7 Recent Adoption of the 2007 LRFD Guide Specifications for Seismic Design of Bridges

*Roy A. Imbsen* ..... 59

## 8 Improvement of Bridge Safety Through Forensic Studies

*George C. Lee and Jerome S. O’Connor* ..... 71

## 9 Summary

*George C. Lee, Mai Tong and W. Phillip Yen* ..... 87

**Biographies of Contributing Authors** ..... 91
