Earth Science Week Activities

MCEER once again participated in Earth Science Week, a national initiative to promote public awareness and understanding of the importance of the earth sciences. As part of this effort, Andrea Dargush staffed an MCEER exhibit on October 14 at a Western New York Earth Science Day. Well over 1,000 children and adults attended the event. Earth Science Week is sponsored by the American Geological Institute, in cooperation with its member societies and others. ❖
