

Contents

Session 1A1: Seismic Accelerated Bridge Construction (ABC)

Moderator: Dan Tobias, Illinois Department of Transportation

Paper No. 1A1-1: Strategic Implementation Plan for Accelerated Bridge Construction in California

Kevin Thompson, Michael Keever and Raymond Wolfe, California Department of Transportation

Paper No. 1A1-2: Pre-Fabricated Bridge Superstructures

Amjad J. Aref, Gordon P. Warn, Petros Sideris and Andre Filiatrault, Department of Civil, Structural and Environmental Engineering, University at Buffalo

Paper No. 1A1-3: Use of Precast Bridge Members in Areas of High or Moderate Seismicity

Jugesh Kapur and Bijan Khaleghi, Bridge and Structures Office, Washington State Department of Transportation

Paper No.1A1-4: Emergency Repair of Damaged Bridge Columns Using Fiber Reinforced Polymer (FRP) Materials

Ashkan Vosooghi and M. Saiid Saiidi, Department of Civil and Environmental Engineering, University of Nevada, Reno; Jim Gutierrez, California Department of Transportation; Scott F. Arnold, Fyfe Co.

Paper No. 1A1-5: Seismic Continuity Performance of Precast Girders Connected to a Cast-in-Place Bent Cap

Kevin Almer and David Sanders, Department of Civil and Environmental Engineering, University of Nevada, Reno

Session 1B1: New Geo-seismic Practice and Guidelines

Moderator: Paul Liles, Georgia Department of Transportation

Paper No. 1B1-1: Analysis of Pile Group Under Lateral Loads Using the LRFD Guidelines

Mohamed Ashour, Civil Engineering Department, West Virginia University Institute of Technology; Gary Norris, Department of Civil and Environmental Engineering, University of Nevada, Reno

Paper No. 1B1-2: Passive Force-Deflection Curves for Abutments with MSE Confined Approach Fills

Luke Heiner, Kyle M. Rollins, and Travis M. Gerber, Department of Civil and Environmental Engineering, Brigham Young University

Contents

Paper No. 1B1-3: SCDOT's New Geo-Seismic Practice

Nicholas E. Harman, South Carolina Department of Transportation; Eduardo A. Tavera, GeoEngineers, Inc.

Paper No. 1B1-4: Proposed AASHTO Specifications for the Seismic Design of Retaining Walls, Slopes and Embankments, and Buried Structures

Donald G. Anderson, CH2M HILL; Geoffrey R. Martin, Department of Civil and Environmental Engineering, University of Southern California; I.P. Lam, Earth Mechanics, Inc.; J.N. Wang, Parsons Brinckerhoff

Paper No. 1B1-5: Effects of Structural Characterizations on Fragility Functions of Bridges Subjected to Seismic Shaking and Lateral Spreading

Jian Zhang, Yili Huo, Pirooz Kashighandi and Scott J. Brandenberg, Department of Civil and Environmental Engineering, University of California, Los Angeles

Session 1A2: Emerging Seismic Design and Retrofit Technologies

Moderator: Stephen Maher, Transportation Research Board

Paper No. 1A2-1: The Development of the FHWA Pushover Analysis Computer Program

J. Jerry Shen, Linda Kuo-Lin, Jeffrey Ger and W. Phillip Yen, Federal Highway Administration

Paper No. 1A2-2: Calibration of a Model to Estimate the Residual Post-Earthquake Capacity of Circular Bridge Columns (Abstract only)

Vesna Terzic and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California Berkeley; Kevin Mackie, Department of Civil and Environmental Engineering, University of Central Florida

Paper No. 1A2-3: Ductility Analysis of Type II Pile Shaft

Larry Wu and Ray Wolfe, California Department of Transportation

Paper No. 1A2-4: Evaluation of Joint Shear Response for Existing California Bridges

Fadel Alameddine and Michael Keever, California Department of Transportation

Paper No. 1A2-5: New Seismic 1000 Year Return Period – Impact to Bridge Design Methodologies

Derrell Manceaux, Federal Highway Administration

Session 1B2: Liquefaction and Mitigation

Moderator: Michael Keever, California Department of Transportation

Contents

Paper No. 1B2-1: Static and Dynamic Lateral Load Tests in Liquefied Sand for the Cooper River Bridge, Charleston, South Carolina

Kyle Rollins, Department of Civil and Environmental Engineering, Brigham Young University; Seth Bowles, Wright Engineers; Luke Hales, ExxonMobil; Scott Ashford, School of Civil & Construction Engineering, Oregon State University

Paper No. 1B2-2: Liquefaction Mitigation on South Carolina Highway Bridge Projects (Abstract only)

William M. Camp, III and Jeffery Sizemore, S&ME, Inc.; Aaron Goldberg and Nicholas Harman, South Carolina Department of Transportation

Paper No. 1B2-3: Retrofitting Bridge SR167/112W for Liquefaction-Induced Settlements

Yang Jiang and Gerald Dorn, HNTB Corp.

Paper No. 1B2-4: Seismic Vulnerability of Bridges Susceptible to Spatially Distributed Soil Liquefaction Hazards (Abstract only)

Bayram Aygun, Leonardo Duenas-Osorio and Jamie Ellen Padgett, Department of Civil and Environmental Engineering, Rice University; Reginald DesRoches, School of Civil and Environmental Engineering, Georgia Institute of Technology

Paper No. 1B2-5: Pile-Supported Embankment and Driven Pile Slope Stabilization Value Engineering for Liquefaction Mitigation

Aaron Goldberg, S&ME Inc.; Mike Miller, F&ME Consultants

Session 1A3: Evolving Bridge Seismic Specifications and Its Impact in Design – A State's Perspective

Moderator: Ed Wasserman, Tennessee Department of Transportation

Paper No. 1A3-1: AASHTO LRFD Guide Specifications for Seismic Design of Highway Bridges (Abstract only)

Roy A. Imbsen, Imbsen Consulting

Paper No. 1A3-2: Comparison of Bridge Designs using AASHTO Guide Specifications and Seismic Provisions in LRFD Specifications for Montana

Stephanie Brandenberger, Montana Department of Transportation

Paper No. 1A3-3: Implementation of 2008 AASHTO Seismic Bridge Design Provisions for Illinois

Daniel H. Tobias, Ralph E. Anderson, William M. Kramer, Riyad M. Wahab and Richard J. Chaput, Illinois Department of Transportation; Chad E. Hodel, WHKS & Co.

Contents

Paper No. 1A3-4: Updated South Carolina Department of Transportation Seismic Design Specifications for Highway Bridges

*Lucero E. Mesa and Saiying Zhou, South Carolina Department of Transportation;
Zhugang Amos Liu, STV/ Ralph Whitehead Associates*

Paper No. 1A3-5: Effects of New LRFD Seismic Bridge Design Specifications to a ‘Normal’ Typical Bridge in New York State

*Rajesh Taneja, Mengisteab Debessay and Arthur P. Yannotti, New York State
Department of Transportation*

Session 1B3: Lessons Learned from Recent Earthquakes and Other Extreme Events

Moderator: Richard Pratt, Alaska Department of Transportation

Paper No. 1B3-1: An Assessment of Damage to Peru’s Highway System after the M8.0 Pisco Earthquake

*Jerome S. O’Connor, MCEER, University at Buffalo; Lucero E. Mesa, South Carolina
Department of Transportation; Monique Nykamp, Shannon & Wilson, Inc.*

Paper No. 1B3-2: Hurricanes Katrina and Rita - Louisiana’s Response and Recovery

*Ray Mumphrey and Hossein Ghara, Louisiana Department of Transportation and
Development*

Paper No. 1B3-3: Replacement of Caminada Bay Bridge in Louisiana Coastal Engineering Study and Support for Design

*Zhengzheng “Jenny” Fu, Arthur D’Andrea and Hossein Ghara, Louisiana Department of
Transportation and Development*

Paper No. 1B3-4: Assessment of Blast Resistance of Seismically Designed Bridges

*Jason Fang, Paul Chung, Ray W. Wolfe and Michael Keever, California Department of
Transportation*

Paper No. 1B3-5: Blast Resistance of Seismically Designed Highway Bridge Piers

*Shuichi Fujikura and Michel Bruneau, Department of Civil, Structural and
Environmental Engineering, University at Buffalo*

Session 2A1: Emerging Seismic Design and Retrofit Technologies

Moderator: Jugesh Kapur, Washington State Department of Transportation

Paper No. 2A1-1: New Tools Available to Practicing Engineers for the Seismic Design of Bridges

*W. Phillip Yen, Federal Highway Administration; George C. Lee and Jerome S.
O’Connor, MCEER, University at Buffalo*

Contents

Paper No. 2A1-2: The Plastic Hinge Demystified

David W. Taylor, Andy E. Cook and J. Preston Felkel, Wilbur Smith Associates

Paper No. 2A1-3: Damping-Enhanced Strengthening: A Unique Way to Normalize the Seismic Performance of RC Bridges for Multiple Objectives

Genda Chen and Kazi R. Karim, Department of Civil, Architectural and Environmental Engineering, Missouri University of Science and Technology

Paper No. 2A1-4: Seismic Retrofit of Highway Bridges in the United States

Glenn Smith, Federal Highway Administration

Paper No. 2A1-5: Evaluating the Seismic Stability and Performance of Freestanding Geofam Embankment

Steven F. Bartlett and Evert C. Lawton, Department of Civil and Environmental Engineering, University of Utah

Session 2B1: Soil-structure Interaction and Foundations

Moderator: Bryan Hartnagel, Missouri Department of Transportation

Paper No. 2B1-1: Soil-Foundation-Structure Interaction of Long-Span Bridge Structures

Anoosh Shamsabadi, California Department of Transportation; Hubert Law and Amir Zand, Earth Mechanics, Inc.

Paper No. 2B1-2: The Golden Ears Bridge Design-Build Project: Foundation Design for Segment 4 Approach Structures

King Sampaco, Ha Pham and Donald Anderson, CH2M HILL

Paper No. 2B1-3: Effect of Nonlinear Pile Stiffness on Bridge Seismic Response

Jin-Xing Zha, California Department of Transportation

Paper No. 2B1-4: Effect of Shallow Foundation Rocking on Dynamic Response of Bridges (Abstract only)

Andres Espinoza and Stephen Mahin, Department of Civil and Environmental Engineering, University of California, Berkeley

Paper No. 2B1-5: Developing Spectra For Type F Soils For Two Bridge Sites Near Salt Lake City

Zia Zafir, Kleinfelder; James Higbee, Utah Department of Transportation

Contents

Session 2A2: Design and Analysis of Major Bridges in Areas of High or Moderate Seismicity

Moderator: Stephanie Brandenberger, Montana Department of Transportation

Paper No. 2A2-1: Seismic Detailing on the Stono River Bridge in South Carolina (Abstract only)

Robert Fish, Lim and Nascimento Engineering Corporation; Ernie Dozzi, HDR Engineering, Inc.

Paper No. 2A2-2: Seismic Evaluation of the I-155 Bridge Over the Mississippi River

Mark R. Capron, Jacobs Engineering

Paper No. 2A2-3: Seismic Analyses and Evaluation for Retrofit of the Suspended Spans of the Bronx-Whitestone Bridge

Ruben B. Gajer, David Rubin, Adam Hapij, Fangyin Zhang, Christopher Mauch and Mohammed Ettouney, Weidlinger Associates, Inc.

Paper No. 2A2-4: Lake Natoma Crossing: Combining High Seismic, River Flow, and Scour Demands with a High Aesthetics Requirement

Robert Fish, Lim and Nascimento Engineering Corporation

Paper No. 2A2-5: Development of Seismic Design Criteria for the Dumbarton and Antioch Toll Bridges, California

Hubert K. Law and Ignatius Po Lam, Earth Mechanics, Inc.; Brian Maroney and Saba Mohan, California Department of Transportation

Session 2B2: Seismic Instrumentation and Monitoring Systems

Moderator: Rajesh Taneja, New York State Department of Transportation

Paper No. 2B2-1: Evaluation of Damage Identification Algorithms Applied to a 4-span Concrete Bridge Subjected to Near Source Ground Motions Using Nonlinear Finite Element Method

Amirhossein Iranmanesh, Seyed A. Bassam, and Farhad Ansari, Department of Civil and Materials Engineering, University of Illinois at Chicago

Paper No. 2B2-2: Changes in Modal Frequencies of a Highway Bridge

Marvin W. Halling, Shutao Xing and Paul J. Barr, Department of Civil and Environmental Engineering, Utah State University; Zachary C. Hansen, ARW Structural Engineers

Contents

Paper No. 2B2-3: Rion-Antirion Monitoring System

Aris Vlamis-Stathopoulos, GEYFRA; Gilles Hovhanessian and Benoit Kroely, Advitam Inc.

Paper No. 2B2-4: Energy Based Approach for Post Seismic Structural Health Monitoring of a Four Span Bridge

Seyed A. Bassam, Amirhossein Iranmanesh and Farhad Ansari, Department of Civil and Materials Engineering, University of Illinois at Chicago

Paper No. 2B2-5: Development of Rocking Column Systems

Matthew J. Tobolski and José I. Restrepo, Department of Structural Engineering, University of California San Diego

Session 2A3: Earthquake Strategies for Protection Against Other Hazards

Moderator: Hossein Ghara, Louisiana Department of Transportation

Paper No. 2A3-1: Developing a Methodology for Comparison of Extreme Hazards for Highway Bridge Design

George C. Lee and Sangyul Cho, Department of Civil, Structural and Environmental Engineering, University at Buffalo; Mai Tong, Federal Emergency Management Agency; W. Phillip Yen, Federal Highway Administration

Paper No. 2A3-2: Multiple Hazard Research Needs and AASHTO Code Development Activities

Harry A. Capers, Arora and Associates, P.C.; George C. Lee, Department of Civil, Structural and Environmental Engineering, University at Buffalo; Jerome S. O'Connor, MCEER, University at Buffalo

Paper No. 2A3-3: Seismic Hazard Considerations within a Multihazard Environment

Mohammed Ettouney, Weidlinger Associates; Sreenivas Alampalli, New York State Department of Transportation

Paper No. 2A3-4: Beneficial Aspects of a Multi-Hazard Approach to Design of Highway Bridges

M. Ala Saadeghvaziri and Bakhtiar Feizi, Department of Civil and Environmental Engineering, New Jersey Institute of Technology

Paper No. 2A3-5: Large-Scale Wave Flume Experiments on Highway Bridge Superstructures Exposed to Hurricane Wave Forces

Thomas Schumacher, Christopher Higgins, Christopher Bradner, Daniel Cox and Solomon Yim, School of Civil and Construction Engineering, Oregon State University

Contents

Session 2B3: Seismic Risk Assessment of Highway Networks

Moderator: Ken Johnson, Federal Highway Administration

Paper No. 2B3-1: Experiences in Creating a Seismic Risk Model of the Oregon Highway Bridge Network Using REDARS2

Peter Dusicka, Michael Glickman and Helen Oppenheimer, Department of Civil and Environmental Engineering, Portland State University; Holly Winston, Oregon Department of Transportation

Paper No. 2B3-2: Seismic Risk Assessment of the Transportation Network of Charleston, South Carolina

Reginald DesRoches and Emily Nilsson, School of Civil & Environmental Engineering, Georgia Institute of Technology; Jamie Padgett, Department of Civil and Environmental Engineering, Rice University

Paper No. 2B3-3: Effects of Retrofits on Seismic Fragility of Multi-Span Continuous Steel Highway Bridges in New York State

Anil K. Agrawal, Department of Civil Engineering, The City College of New York; Ying Pan, Gilsanz Murray Steficek; Sreenivas Alampalli, New York State Department of Transportation

Paper No. 2B3-4: Seismic Risk Assessment of Priority Bridges along I-24 in Western Kentucky

Wael Zatar, College of Engineering, Marshall University; Issam Harik and Tong Zhao, Department of Civil Engineering, University of Kentucky; Wei-Xin Ren, Department of Civil Engineering, Fuzhou University

Paper No. 2B3-5: Probabilistic Damage Control Approach (PDCA) and Performance-Based Design of Bridges

Abbas M. Tourzani, Amir M. Malek, Sam Ataya and Mark Mahan, California Department of Transportation

Session 3A1: International Technologies and Practices

Moderator: Juan Caicedo, University of South Carolina

Paper No. 3A1-1: Wind Extreme Loads (Abstract not available)

Dorian Janjic, Bentley Systems, Inc.

Paper No. 3A1-2: Advanced Seismic Design Considerations for Highway and High Speed Railway Bridges in Spain

Jose-Luis Sanchez Jimenez, Department of Structural Engineering, TYPSA

Contents

Paper No. 3A1-3: Expected Behavior of the Infiernillo II Bridge in Mexico

José M. Jara, Manuel Jara and Hugo Hernández, Civil Engineering School, University of Michoacán, Mexico

Paper No. 3A1-4: Experimental Investigations of Precast Segmental Bridge Columns Seismically Isolated with Lead-Rubber Bearings

Yu-Chen Ou and George C. Lee, Department of Civil, Structural and Environmental Engineering, University at Buffalo; Mu-Sen Tsai and Kuo-Chun Chang, Department of Civil Engineering, National Taiwan University; Ping-Hsiung Wang, National Center for Research on Earthquake Engineering, Taipei

Paper No. 3A1-5: Seismic Performance of a Skewed Bridge with Sliding Rubber Bearings (Abstract only)

Kevin Lui and Kuo-Chun Chang, Department of Civil Engineering, National Taiwan University

Session 3B1: Effects of Near-field Earthquakes on Bridges

Moderator: Derrell Manceaux, Federal Highway Administration

Paper No. 3B1-1: Simplified Analysis of Bridges Crossing Fault-Rupture Zones

Rakesh K. Goel, Department of Civil and Environmental Engineering, California Polytechnic State University; Anil K. Chopra, Department of Civil and Environmental Engineering, University of California, Berkeley

Paper No. 3B1-2: Study of Pulse Effects of NFGM on the Dynamic Response of Bridge Structures

Ajit C. Khanse and Eric M. Lui, Department of Civil and Environmental Engineering, Syracuse University

Paper No. 3B1-3: Effects of Near-field Earthquakes on Bridges with Tall Bearings

Monique C. Hite and Siddharth Srivastava, Department of Civil Engineering, Texas A&M University; Reginald DesRoches and Roberto T. Leon, School of Civil and Environmental Engineering, Georgia Institute of Technology

Paper No. 3B1-4: Development of a Biaxial Hysteretic Model for Reinforced Concrete Structures

Shu-Hsien Chao and Chin-Hsiung Loh, Department of Civil Engineering, National Taiwan University

THE SIXTH NATIONAL CONFERENCE ON BRIDGES & HIGHWAYS

Seismic Technologies for Extreme Loads

Contents

Paper No. 3B1-5: The Influence of Vertical Earthquake Motion and Pre-Earthquake Stress State on the Seismic Response of Precast Segmental Bridge Superstructures

Mark Veletzos and José I. Restrepo, Department of Structural Engineering, University of California at San Diego

Contents

Poster Session

Moderator: Reginald DesRoches, Georgia Institute of Technology

Coordinator: Tina Hembree, South Carolina Department of Transportation

Poster No. P01: Nonlinear Analysis of Seismically Isolated Bridges with Inverted-T Cap Beams

Alp Caner, Middle East Technical University; Cenan Ozkaya, Yuksel Project International Co.

Poster No. P02: 2008 New York City DOT Seismic Design Guidelines for Bridges Considering Local Site Conditions

Ruben Gajer, Weidlinger Associates, Inc.; Ricardo Dobry, Consultant; Walter Silva, Pacific Engineering and Analysis; Thomas Thomann, URS Corp.; Kamal Kishore, Jay Patel, Abdur Razzaq and Sajjan Jain, New York City Department of Transportation

Poster No. P03: Seismic Performance of Reinforced Concrete Bridge Columns at Low Temperatures

Luis A. Montejo, Mervyn J. Kowalsky and Tasnim Hassan, Department of Civil Engineering, North Carolina State University

Poster No. P04: Seismic Response of Skewed RC Box-Girder Bridges

Ahmed Abdel-Mohti and Gokhan Pekcan, Department of Civil and Environmental Engineering, University of Nevada, Reno

Poster No. P05: Improving Tomorrow's Infrastructure: Extending the Life of Concrete Structures with Solid Stainless Steel Reinforcing Bar

Raymond E. Schnell, Talley Metals Technology, Inc.; M. P. Bergmann, New York State Department of Transportation

Poster No. P06: Impacts of New Provisions on the Seismic Design of Tennessee's Bridges

Timothy Huff, Tennessee Department of Transportation

Poster No. P07: Case Studies in High Channel Count Integrated Systems for Monitoring Bridge Structures

Kurt Veggeberg, National Instruments

Poster No. P08: Performance-Based Seismic Assessment of the Existing Grand Avenue Bridge in St. Louis Missouri versus Conventional Methods

Amir A. Arab and Kevin C. Kriete, HDR, Inc.; William Early, City of St. Louis – Design Division

Contents

Poster No. P09: Seismic Evaluation and Retrofit of the Brooklyn Bridge

Serafim Arzoumanidis and Nicholas Edwards, Parsons Corporation; Jay Patel, Kamal Kishore, Hasan Ahmed and Walter Kulczycki, New York City Department of Transportation

Poster No. P10: Advances on On-Line Bridge Seismic and Structural Health Monitoring Using Fiber Optic Sensing Technology (Abstract only)

Tom W. Graver, Steve Ferguson, Todd Haber, Andrei Csipkes and Jeff Miller, Micron Optics, Inc.

Poster No. P11: Development of ARS Curve for a Long Multi-Span Bridge at a Liquefiable (Type F) Site

Endi Zhai and Houman Makarechi, Kleinfelder, Inc.

Poster No. P12: Web Buckling Prevention in Built-up Shear Links

Marco Rosignoli, HNTB Corp.; Chiara Rosignoli

Poster No. P13: Effects of CFRP Wraps on Strength and Ductility of Slender Concrete Columns

Pedram Sadeghian, Amir H. Shekari and Farid Mousavi, Islamic Azad University of Qazvin

Poster No. P14: Effect of Abutment Modelling on the Seismic Response of Bridge Structures

Ady Aviram and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California Berkeley; Kevin Mackie, Department of Civil and Environmental Engineering, University of Central Florida

Poster No. P15: Post-Earthquake Bridge Repair Cost Evaluation Methodology

Kevin Mackie, Department of Civil and Environmental Engineering, University of Central Florida; John-Michael Wong and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California, Berkeley

Poster No. P16: Use of Steel Jackets to Retrofit Reinforced Concrete Columns in Tidal Water/Wetland

Hongzhi Zhang, Bridge and Structures Office, Washington State Department of Transportation

Poster No. P17: Low-Cycle Fatigue Behavior of Stainless Steel Reinforcing Bars

Yihui Zhou, Yu-Chen Ou and George C. Lee, Department of Civil Structural and Environmental Engineering, University at Buffalo; Jerome S. O'Connor, MCEER, University at Buffalo

Contents

Poster No. P18: Cyclic Behavior of RC Bridge Columns under Combined Loadings including Torsion

Suriya Prakash Shanmugam and Abdeldjelil Belarbi, Missouri University of Science and Technology; Ashraf Ayoub, University of Houston

Poster No. P19: Effect of Coupled Shear-Bending Deformations on the Behavior of RC Highway Structures Subjected to Extreme Seismic Loading

T. Ravi S. Mullapudi and Ashraf Ayoub, University of Houston; Abdeldjelil Belarbi, Missouri University of Science and Technology

Poster No. P20: Seismic Performance Goals and Probabilistic Assessment of Expansion Joints for Highway Bridges

Jamie E. Padgett, Rice University; Reginald DesRoches, Georgia Institute of Technology; Paul Bradford, Watson Bowman Company

Poster No. P21: A Simple Procedure for Evaluating Seismic Isolation in Bridges

Mary Jacak, Seismic Energy Products

Poster No. P22: Seismic Analysis of Frame Bridges in Distrito Federal, Mexico

Hugo Hernández-Barrios, José Manuel Jara-Guerrero and Manuel Jara-Díaz, Universidad Michoacana de San Nicolas de Hidalgo

Poster No. P23: Liquefaction Evaluation of the CREC Geotechnical Experimentation Site near Charleston, South Carolina Based on Cone Tests

Ronald Boller and William Camp, S&ME, Inc.; Ronald Andrus and Hossein Hayati, Department of Civil Engineering, Clemson University; Sarah Gassman, Department of Civil and Environmental Engineering, and Pradeep Talwani, Department of Geological Sciences, University of South Carolina

Poster No. P24: Reinforced Concrete Bridge Seismic Damage and Loss Scenarios

John-Michael Wong and Bozidar Stojadinovic, Department of Civil and Environmental Engineering, University of California, Berkeley; Kevin Mackie, Department of Civil and Environmental Engineering, University of Central Florida; Richard Porter, California Department of Transportation

Poster No. P25: Seismic Vulnerability Study of the Auburn-Foresthill Bridge

Wei Li and Hassan Sederat, SC Solutions, Inc.; John Quincy and Mark Reno, Quincy Engineering Inc.

Poster No. P26: Seismic Pushover Analysis – Results Presentation

Douglas Sarkkinen and Greg Dreeszen, Kramer Gehlen & Assoc., Inc.

Contents

Poster No. P27: Seismic Vulnerability Assessment of Highway Bridges Considering Ground Motion Directionality

Swagata Banerjee and Masanobu Shinozuka, Department of Civil and Environmental Engineering, University of California, Irvine

Poster No. P28: Geotechnical Characterization of the Fort Dorchester Site in South Carolina for Paleoliquefaction Evaluation

Michael Hasek and Sarah Gassman, Department of Civil and Environmental Engineering, and Pradeep Talwani, Department of Geological Sciences, University of South Carolina; Ronald Andrus, Department of Civil Engineering, Clemson University; William Camp, S&ME, Inc.

Poster No. P29: Seismic Response Simulations of Bridges Considering Shear-Flexural Interaction of Columns

Jian Zhang and Shi-Yu Xu, Department of Civil and Environmental Engineering, University of California, Los Angeles

Poster No. P30: The Use of Paleoliquefaction Features in Seismic Hazard Assessment – The Charleston Experience

Pradeep Talwani, Department of Geological Sciences and Sarah L. Gassman, Department of Civil and Environmental Engineering, University of South Carolina

Poster No. P31: Vertical Seismic Profiling Requirements for Deep Soil Deposits (Abstract only)

Scott Stovall and Shahram Pezeshk, The University of Memphis

Poster No. P32: Life-Cycle Cost Evaluation of Neutralized Reinforced Concrete Bridges Subjected to Earthquake

Y.C. Sung, C.K. Su, C.C. Hsu and M.C. Lai, Department of Civil Engineering, National Taipei University of Technology; K.Y. Liu, National Center for Research on Earthquake Engineering; K.C. Chang, Department of Civil Engineering, National Taiwan University

Poster No. P33: Vulnerability Assessment of an Existing Highway Bridge by Pushover and 3-D Nonlinear Time History Analyses for its Seismic Retrofit

Mahmood Hosseini, Structural Research Center, International Institute of Earthquake Engineering and Seismology; Yashar Banaeizadeh, Civil Engineering Department, South Tehran Branch of the Islamic Azad University; Seyyed Reza Khavari, Earthquake Engineering Department, Science and Research Branch of the Islamic Azad University

Contents

Poster No. P34: Expansion Dams/Deck Joint Systems – Closed Cell Foam Technology for Armorless Joints

Doug Zuberer, Chase Construction Products

Poster No. P35: Long Term Protection for Concrete Bridges

Doug Zuberer, Chase Construction Products

Poster No. P36: Contribution of Rail Stiffness to the Design and Retrofit of Simply Supported Multi-Span Bridges

Muhammad Sarwar, URS Washington Division

Poster No. P37: Passive Control System of a Cable-stayed Bridge

Kehai Wang and Qian Li, Research Institute of Communications, The Ministry of P.R. China; W. Phillip Yen, Federal Highway Administration

Poster No. P38: Innovative Designs for Rapid Construction of Military Bridge Systems Using Vanadium Containing High Strength Low Alloy (HSLA-V) Steel (Abstract only)

D.C. Rizos, Department of Civil and Environmental Engineering, University of South Carolina; T. Stanton, US Army Engineering Research & Development Center; A. Ferro, Intelligent Engineering; J. Mulliken, The LPA Group, Inc.; G. Bovard, Augusta Iron and Steel Works, Inc.

Poster No. P39: Dynamic Traveller Response Modelling for Seismic Risk Analysis of Transportation Systems (Abstract only)

Hyun Chan Kim, Xuesong Zhou and Steven F. Bartlett, Department of Civil and Environmental Engineering, University of Utah
