

Cross, Westergaard, and Newmark: Contributions to the Art of Thinking about Structural Design

This brief bibliography is intended to provide resources for those wishing to review selected works by influential thinkers Hardy Cross (1885-1959), Harald M. Westergaard (1888-1950), and Nathan M. Newmark (1910-1981), as well as general information on the philosophy and history of engineering education. This is not an exhaustive list, but a starting point for further investigation.
